Comment Text :

1 --> [Yucca mountain is a poor place for a repository. It is earthquake prone and there is an underground stream. If nuclear waste is stored there, it will endanger the lives of millions of people in Southern Nevada and Utah. When I first moved to Nevada in 1975, I was appalled at the level of cancer and other birth defects that were caused by the above ground nuclear tests. I saw some of them in various schools around the valley when I was a substitute teacher.

I am writing to ask you not to endanger our people any further. In the past, we were ignorant and uninformed. Today, we have the knowledge of what this poison can do. I believe that further consideration of Yucca Mountain as a nuclear repository, in the light of our knowledge of the harm it can do to our residents, is a criminal act. I am just waiting until someone in power has the courage to declare it so. Nevada is not a wasteland.]
